PARTHIBAN GOWTHAMAN

AI Transformation Expert | GenAI & LLM Solutions Leader | Agentic AI Architect | FinTech & Banking Analytics Specialist | Multi-Agent Systems Architect

EMAIL: gowthamparthiban@gmail.com

https://linkedin.com/in/parthiban-gowthaman-50257017
PORTFOLIO: https://parthiban-g.vercel.app/

Results-oriented AI engineer, targeting to leverage expertise in ML, and Financial Analytics to design and scale enterprise-grade AI solutions that accelerate decision-making, unlock business value, and drive digital transformation through intelligent, autonomous, trusted AI systems.

PROFILE SUMMARY

- **AI/ML professional** with **13+ years** of experience in delivering advanced analytics, predictive modeling, Generative AI, and enterprise-scale intelligent automation solutions across **banking, fintech, credit intelligence, pricing optimization & financial services domains**.
- Spearheaded organization-wide AI transformation initiatives by partnering with executive leadership to drive GenAI adoption, establish enterprise AI standards, and embed AI-first ways of working that enhanced analytical productivity and decision intelligence.
- Skilled in designing & deploying production-grade LLM applications leveraging **Agentic AI, Multi-Agent Frameworks, RAG**, **Prompt Engineering, Vector Databases, agentic pipelines and autonomous AI workflow** for complex business use cases.
- **Architected intelligent research and analysis platforms** that automated earnings transcript reviews, financial document intelligence, industry assessment, portfolio risk evaluation, and strategic scenario modeling, enabling faster and more informed business decisions.
- Strong track record of **translating business challenges into scalable AI products** by combining deep domain knowledge in banking, lending, treasury operations, pricing strategy, and financial analytics with cutting-edge AI technologies.

CORE COMPETENCIES

- Stakeholder Management
- AI Transformation Strategy
- Machine Learning Solutions
- Large Language Models (LLMs)
- Enterprise AI Adoption
- Predictive Analytics
- Business Intelligence Solutions | Financial Intelligence Analytics
- Prompt Engineering
- AI Product Innovation
- Multi-Agent Architectures
- Strategic Technology Implementation
- MLOps & Model Governance
- Retrieval-Augmented Generation (RAG)
- Treasury & Pricing Optimization
- Financial Risk Management | Market Analysis Framework

PROJECT UNDERTAKEN

AI-Assisted Portfolio Development

- Built with Claude Code and verified by human, showcasing practical implementation of agentic AI workflow for software development.

CERTIFICATIONS

- AI Coding for Real Engineers (2026)
- Agent Skills with Anthropic
- Multi AI Agent Systems with CrewAI
- Building Systems with LLMs

TECHNICAL SKILLS

- **Core:** Python, SQL, Git
- **Gen AI & LLMs:** Claude, Claude Code, Prompt Engineering, RAG (Retrieval-Augmented Generation), LangChain, LlamaIndex, CrewAI, Vector Databases, MCP (Model Context Protocol), Agentic AI, Firecrawl
- **Machine Learning:** Scikit-Learn, TensorFlow, PyTorch
- **MLOps:** Docker, MLflow, GitHub
- **Cloud:** Vertex AI, Azure ML, AWS SageMaker, Google Cloud
- **Statistics:** Time-Series Analysis, Hypothesis Testing

EDUCATION

- **2013:** Master of Science in Financial Economics from Madras School of Economics, Chennai
- **2009:** Bachelor of Engineering in Electrical & Electronics from PSNA College, Anna University, Chennai

CAREER TIMELINE (Recent 3)

May'15 – Oct'21: Manager - Advanced Analytics COE | Flex

Nov'21 – Apr'26: VP - Machine Learning | OakNorth Credit Intelligence

Apr'26 - Present: AI-native Engineer | OakNorth Bank

WORK EXPERIENCE

Apr'26 - Present: AI-native Engineer | OakNorth Bank | Bengaluru | Pricing Optimization Pod

Role:

- Working as a **Forward Deployed Engineer**, embedding with **treasury and pricing teams** to translate pricing challenges into **production-ready AI solutions** while keeping **human judgment** at the centre of decision-making.
- Building **LLM-native, agentic decision systems** for **pricing optimisation**, combining **LLM reasoning, tool use, structured financial data,** and **real-time market intelligence**.
- Building an **AI-powered monitoring agent** that tracks **competitor savings rates on MoneySavingExpert** and delivers **structured briefings** to treasury teams on **rate movements and deposit competition**.
- Developing an **ML-based what-if model** trained on **historical rate, best-buy rank, and inflow data** to predict **expected deposit inflows and reinvestment outcomes** for different pricing decisions, providing treasury with a **data-driven basis for rate setting**.
- Contributing to bank's **BigQuery data platform** with **AI-native SDLC using Claude Code**, building **dbt mart models** & resolving **platform tickets** across **planning, SQL development, testing, documentation**, with **human-reviewed pull requests** deployed through **CI/CD**.

Highlights:

- Built an ML-based what-if model, trained on historical rate, best-buy rank and inflow data, that predicts expected deposit inflows and reinvestment for each pricing choice, giving treasury a data-driven basis for rate decisions.
- Contributed to the bank's BigQuery data platform using an AI-native SDLC with Claude Code. Built dbt mart models and resolved platform tickets, using AI across planning, SQL development, testing and documentation, with human-reviewed PRs deployed through CI/CD.

Nov'21 – Apr'26: VP - Machine Learning | OakNorth Credit Intelligence | Bengaluru

Role:

- Led the organization's **GenAI transformation from the CEO's office**, turning emerging LLM capabilities into practical solutions that improved analyst productivity and accelerated knowledge-intensive workflow.
- Established enterprise-wide **LLM engineering standards, evaluation practices, and reusable AI patterns**, creating a foundation for scalable GenAI adoption.
- Built automated intelligence systems for **earnings transcripts and 10-K filings**, combining prompt engineering, RAG, Claude API, and structured extraction to turn unstructured disclosures into decision-ready insights.
- Developed **scenario analysis platforms for CRE and C&I loan portfolios**, enabling teams to explore portfolio sensitivity, emerging risks, and potential business outcomes under different macroeconomic conditions.
- Architected **multi-agent deep research systems** for NAICS/SIC industry intelligence, orchestrating specialized agents to research, synthesize, challenge, and consolidate complex industry information.
- Built a **GenAI disruption-risk intelligence pipeline** to identify industries and business models potentially exposed to technological disruption and translate emerging AI trends into actionable risk signals.
- Partnered closely with business and research teams to identify high-value opportunities for AI augmentation, balancing **technical sophistication with measurable analyst impact and usability**.
- Helped shift AI adoption from isolated experimentation toward **repeatable, production-oriented workflow embedded in day-to-day decision process**.

May'15 – Oct'21: Manager - Advanced Analytics COE | Flex | Chennai

Role:

- Built **price forecasting and predictive analytics models** for electrical components, helping commodity managers anticipate cost movements and uncover sourcing and savings opportunities.
- Led analytics initiatives spanning **inventory optimization, demand forecasting, supplier intelligence, and cost modeling**, translating complex operational data into actionable business decisions.
- Established a scalable **advanced analytics framework** covering problem formulation, modeling, validation, deployment, and stakeholder adoption across multiple business use cases.
- Worked closely with business stakeholders to bridge the gap between sophisticated analytical models and **practical decisions on the ground**, ensuring models translated into measurable operational value.
- Mentored Data Science talent through individualized growth plans, technical coaching, and hands-on guidance across analytics projects.

Jun'13 – Apr'15: Predictive Data Analyst | Quantium Analytics | Hyderabad

Role:

- Delivered **competitive pricing intelligence** for the Australian flood insurance market, supporting strategic pricing and market assessment for insurance-sector stakeholders.
- Analyzed large and diverse datasets to identify **pricing patterns, competitive dynamics, and market signals**, translating quantitative findings into clear business insights.
- Partnered with the offshore analytics team to develop data-driven intelligence that helped stakeholders understand **market positioning and competitive pricing behavior**.
